Sommaire
Volume 73,1995

January–February / janvier–février

Donald L. Singleton, George Paraskevopoulos, and Robert S. Irwin Laser ablation of silicon and aluminum. A photoacoustic and time-resolved-reflectivity study 1

Luc Marleau New classes of summable Skyrmions 6

D.W. Lawther and R.A. Dunlap In situ ^{64}Cu Doppler-broadening positron-annihilation methods for elevated temperature study of defect formation in metals 11

M.R.J. Hachey and F. Grein The spectroscopy of H_2CS. 1. CS stretch potential curves for singlet states of planar H_2CS, obtained by ab initio multireference C1 methods 18

J. Murdoch, F.S. Razavi, and J.A. Moore Compositional dependence of thin films of BiPbSrCaCuO on target to substrate distance 35

W.R. Datars. S. Galts, T. Olech, and P.K. Ummat An efficient fulleride production system 38

S. Roorda, B. Morin, E. Soudée, and S.C. Gujrathi Backside gettering of Cu by porous Si 45

K.R. Brownstein Product trial function for confined quantum systems 48

J.G. Hykawy Can photoionization effects explain the solar-neutrino problem? 53

Marcin Molski and Jerzy Konarski Modified Dunham potential for rovibrational diatomic systems 59

R.R. Kildiyarova, Y.N. Joshi, M.A. Lumsden, and A.J.J. Raassen Analysis of the $(5d^8 + 5d^7 6s)$-$5d^7 6p$ transitions of seven-times-ionized bismuth: Bi VIII 63

D. Baddou, C. Rioux, R.J. Slobodrian, and J.M. Nelson Analysing powers and differential cross sections of (^{3}He,p) reactions on ^{6}Li and ^{7}Li at low energy 74

S.R. Vatsya Mechanics of a particle in a gauge field 85

S.O. Kasap and B. Polischuk Application of the interrupted field time-of-flight transient photoconductivity technique to investigating sample inhomogeneities: Cl-doped amorphous Se:Te and Se:As films 96

T.J. Scholl, R. Cameron, S.D. Rosner, and R.A. Holt Laser-rf double-resonance study of SiO^+ 101

M. Howard Lee *Note*: Note on a logarithmic integral for the plasma energy of the electron gas 106

Instructions to authors / Recommandations aux auteurs iii

Research Journals publication policy / Revues scientifiques politique de publication ix

March–April / mars–avril

Ermanno F. Borra *Review/Synthèse* : Liquid mirrors 109

D.E.N. Brancus and A.C. Mocuta Anisotropic optical polaron in crystals with complex structure 126

M. Razavy Dissipation-assisted tunneling in asymmetric double-well potentials 131

Ileana Guiasu and Roman Koniuk Two-photon widths from the Bethe–Salpeter wave function 138

İ. Akgün A lattice dynamical study of Cu and Ni based on a new empirical many-body potential 143

R. Akis, C. Barnes, and G. Kirczenow Edge states, band structure, and the Hall effect in two-dimensional lattice structures: quantum dot arrays and the tight-binding model 147

Abdel Raouf F. Elhefnawy The effect of magnetic fields on the nonlinear instability of two superposed magnetic streaming fluids, each of a finite depth 163

E. Sheregii, M. Kuźma, C. Abeynayake, and M. Pociask Creation of a pn heterojunction in $Hg_{1-x}Cd_xTe$ ($x \approx 0.2$) by laser annealing 174

Kelly A. Linehan and John R. de Bruyn Gravity currents and the electrolyte concentration field in electrochemical deposition 177

Alexander A. Vlasov Phenomenological approach to the viable nonmetric relativistic scalar 4-vector theory of gravitation 187

Jan Vrbik Two-body perturbed problem revisited 193

P. Legentilhomme, J.A. Ferré et Francesc Giralt Analyse du sillage proche d'une sphère par une méthode de reconnaissance de formes 199

J.A. Koehler, G.J. Sofko, D. André, M. Maguire, R. Osterried, M. McKibben, J. Mu, D. Danskin, and A. Ortlepp The SAPPHIRE auroral radar system 211

A. Khalil, F. Membrey, M. Fromm et A. Chambaudet Ouvertures de traces développées de particules α dans un détecteur polymérique (CR39) : modélisation et vérification expérimentale 227

A. Bhattacharya, T.L. Remadevi, and S.N. Banerjee On the electromagnetic form factors of the nucleon 236

Mayer Humi On the algebraic treatment of the spin–orbit interaction 241

K.L. Poon, K. Young, and D. Kiang *Note*: Thermodynamic properties of a finite one-dimensional system of bosons with repulsive delta-function interaction 245

W. Que *Note*: Onsager theory of geminate recombination: A single series expansion 248

A. Bonnano, S. Droz, W. Israel, and S.M. Morsink *Erratum*: The internal evolution of black holes 251

May–June / mai–juin

HIGH-PRESSURE SCIENCE AND TECHNOLOGY ARTICLES PRESENTED AT THE WORKSHOP / SCIENCE ET TECHNOLOGIE DE LA HAUTE PRESSION ARTICLES PRÉSENTÉS À L'ATELIER

John S. Tse and Dennis D. Klug Theoretical studies of structural stability at high pressure 253

T.W. Swaddle Inorganic solution chemistry at elevated pressures 258

Michael V. Basilevsky and Noham N. Weinberg A microscopic theory of chemical reactions under high pressures 267

M.J. Walter, Y. Thibault, K. Wei, and R.W. Luth Characterizing experimental pressure and temperature conditions in multi-anvil apparatus 273

R.A. Secco High p,T physical property studies of Earth's interior: Thermoelectric power of solid and liquid Fe up to 6.4 GPa 287

Frank Kamler, P. Niessen, and R.J. Pick Measurement of the behaviour of high-purity copper at very high rates of strain 295

Fangzhi Wang and Axel Meisen Canola paste extrusion for feeding supercritical extractors 304

Sidney Mindess Crack velocities in concrete subjected to impact loading 310

M.J. Worswick, J.A. Clarke, and R.J. Pick Dynamic fracture under impact and high-strain-rate loading 315

Cosmo Carlone and Monia Buteau Studies of irradiated cadmium sulfide in a diamond anvil pressure cell 324

Douglas R. Schmitt and Yong Yi Li A high-pressure technique for determining the microcrack porosities of damaged brittle materials 330

PAPERS ON GENERAL TOPICS / ARTICLES SUR DES SUJETS GÉRÉRAUX

Hafez Kobeissi and Chafia H. Trad "Nonintegral" expressions for the diatomic centrifugal distortion constants 339

Yeong-Chuan Kao and Hsiang-Nan Li Infrared finiteness of the two-loop correction to the Chern–Simons term in the Yang–Mills–Chern–Simons theory 344

V.L. Golo et E.I. Kats La relation d'Einstein pour le mouvement brownien des membranes 349

Yinlong Sun and George Kirczenow Theory of interacting parallel quantum wires 357

Fu-Hu Liu and Han-Cheng Sun Investigation of correlations between conditional moments in nuclear fragmentation at high energy 365

Ajay Kumar, K.M. Shaju, and Suresh Chandra Ion transport in silver–lead–borate glass and evidence of ion association 369

M. Zhang and A.A. Sebak Radiation characteristics of a slot antenna on a conducting prolate spheroid 376

Usha Kulshreshtha, D.S. Kulshreshtha, and H.J.W. Müller-Kirsten BRST formulation of the Christ–Lee model 386

Robert H. Tyler and Lawrence A. Mysak Electrodynamics in a rotating frame of reference with application to global ocean circulation 393

J.R. Krumrine, A. Musgrove, and T.B. Lucatorto *Comment on*: Two-photon absorption series of calcium 403

Y. Makdisi and K.S. Bhatia *Reply to comment*: Two-photon absorption series of calcium 405

Notice to authors / Note aux auteurs IFC

July–August / juillet–août

Birsen Saka and Erdem Yazgan Reflector antenna pattern improvement using optimized array feed 407

T.T. Chia and B.L. Tan Maps with relative, apparently real periods 412

J.M. Daniels Spin relaxation of polarized helium-3 in the magnetic field of a Helmholtz pair 420

M.L. Senent, D.C. Moule, and Y.G. Smeyers An ab initio and spectroscopic study of dimethyl ether: An analysis of the infrared and Raman spectra 425

Seong-Chan Lee, Zi-Hong Yoon, and Soon-Chul Kim Density profiles of fluids in some special symmetries 432

L.I. Dorman and I.V. Dorman Cosmic-ray atmospheric electric field effects 440

R. Zhou and L. Shafai Directivity enhancement by layered radomes 444

U. Häring, W.A. Kreiner, G. Magerl, and W. Schupita Side-band spectroscopy in the visible with a tunable modulator 452

D.G.C. McKeon Vacuum polarization in a background magnetic field in (2 + 1)-dimensional QED 458

A.M. Grundland and L. Lalague Lie subgroups of symmetry groups of fluid dynamics and magnetohydrodynamics equations 463

Rachad M. Shoucri Coherent states, Schrödinger equation, and the Hamilton–Jacobi equation 478

W.A. van Winjgaarden and J. Li Hyperfine splittings and isotope shifts of $(6s)^2\,{}^1S_0 \rightarrow (6s6p)^1\,P_1$ transition in barium 484

G. Wang, P.K. Ummat, W.R. Datars, and Zhibing Hu The de Haas van Alphen effect of MoF_6^- intercalated graphite 489

Richard L. Hall and Nasser Saad Energy bounds for the spiked harmonic oscillator 493

Ranjan Chaudhury Schemes for the calculation of the free energy and specific heat for marginal Fermi liquids in the normal and superconducting phase 497

W.E. Jones and Lixin Wang A BOXCARS investigation of the interspecies V–V energy transfer from highly excited SF_6 to N_2 505

R.F. Carlson, A.J. Cox, T. Eliyakut-Roshko, and W.T.H. van Oers Measurements of proton total reaction cross sections for ^{112,114,116,118,120,122,124}Sn from 22 to 48 MeV 512

Y.P. Varshni, Nivedita Nag, and Rajkumar Roychoudhury Exact solutions for the potential $V(r) = r^2 + \beta/r^4 + \lambda/r^6$ by supersymmetric quantum mechanics 519

Geneviève Béïque, Mario Caron, John F. Currie et Michel Meunier Caractérisation structurale de couches minces de silicium polycristallin fabriquées par dépôt chimique en phase vapeur sous basse pression du SiH_4 et dopées en phosphore in situ 526

P.M. Sinclair, P. Duggan, J.R. Drummond, and A.D. May Broadening and shifting of the depolarized component of the Raman Q branch in D_2 at room temperature 530

K. Hussein and M. Aubert-Frecon Perturbation model for the $X^1\Sigma^+$ and $a^3\Sigma^+$ states of NaK at intermediate internuclear distances beyond 6 Å 537

G.P. Flessas, P.G.L. Leach, and S. Cotsakis *Note*: On Noether's formulation of her theorem 543

G. Blanquet, J. Walrand, C.P. Courtoy, and M. Dang-Nhu *Erratum*: Diode-laser spectra of the ν_4 Q branch of methyl isocyanide 544

Notice to authors / Note aux auteurs IFC

Editorial / Éditorial iii

September–October / septembre–octobre

J. Chen, R. Kobes, and J. Wang Finite-size effects in metallic superlattice systems 545

T.K. Ghosh, D. Ray, and P.K. Mukherjee Oscillator strengths for highly stripped ions of carbon isoelectronic sequence 554

M. Korek and H. Kobeissi New analytical expression for the rotational factor in Raman transitions 559

B. Champagne, M. Kjiri, J. Patera, and R.T. Sharp Description of reflection-generated polytopes using decorated Coxeter diagrams 566

Wen Chao Chen et Louis-André Hamel Calcul analytique du transport des charges dans le a-Si:H 585

Galal M. Moatimid The effect of a time harmonic-magnetic field on the stability of cylindrical ferrofluids in the presence of heat and mass transfer 595

S.R. Vatsya Mechanics of a charged particle on the Kaluza–Klein background 602

T. Do-Nhat Deflection angle of a massless particle under Reissner–Nordström's metric 608

D.G.C. McKeon The effect of renormalization in a finite massive theory 615

Patrick Cornille The Lorentz force and Newton's third principle 619

Pablo J. Prado, Robin L. Armstrong, and Brian Powell Influence of substitutional impurities on the static and dynamical behaviour of K_2OsCl_6 in the vicinity of the structural phase transition: A neutron diffraction study 626

M.R.M. Witwit and J.P. Killingbeck A Hill-determinant approach to symmetric double-well potentials in two dimensions 632

N. Ghahramany and H. Falinejad Formation of the interaction matrix in pion–nucleon scattering in optimal conditions and amplitude determination at 471, 547, and 625 MeV c^{-1} 638

M.A. El-Borie Galactic cosmic-ray modulation effect by solar-wind streams 642

M. Apostol *Note*: On the long-wavelength limit of the structure factor 647

Pablo Prado, Robin L. Armstrong, and Brian Powell *Note*: Comments on the crystal structure of solid trichlorofluoromethane 650

Notice to authors / Note aux auteurs IFC

Obituary / Nécrologie iii

November–December / novembre–decembre

W.R. Datars, T.R. Chien, and P.K. Ummat Properties of perylene reacted with AsF_5 653

N.P. Raju and J.E. Greedan Magnetic and powder neutron-diffraction studies of hexagonal β-$NaCoPO_4$: A possible geometrically frustrated magnet 658

C.C. Homes, T. Timusk, D.A. Bonn, R. Liang, and W.N. Hardy Optical phonons polarized along the c axis of $YBa_2Cu_3O_{6+x}$ for $x = 0.5 \rightarrow 0.95$ 663

I.D. Brown Anion-anion repulsion, coordination number, and the asymmetry of hydrogen bonds 676

A.W. Overhauser Pair-correlation function of an electron gas 683

Myer Bloom and Thomas M. Bayerl Membranes studied using neutron scattering and NMR 687

T.E. Mason, K.N. Clausen, G. Aeppli, D.F. McMorrow, and J.K. Kjems RITA: The reinvented triple axis spectrometer 697

S.-H. Chen, P. Gallo, and M.-C. Bellissent-Funel Slow dynamics of interfacial water 703

P. Jeffrey Ungar, Kari Laasonen, and Michael L. Klein Ab initio simulation of the structure and dynamics of white phosporus (P_4) at low temperatures 710

G.H. Lander, W.G. Stirling, and B.R. Cooper Neutron inelastic-scattering experiments on semimetallic actinide compounds 718

V.F. Sears, E.C. Svensson, and B.M. Powell Phonon density of states in vanadium 726

S. Takeda and P.A. Egelstaff The isotope effect in the electronic structure factors of liquid NH_3 and ND_3 735

Stephen W. Lovesey Time-dependent critical spin fluctuations in magnetic salts 741

E. Kartini, M.F. Collins, B. Collier, F. Mezei, and E.C. Svensson Neutron-diffraction studies on liquid, glassy, and crystalline $Ca_{0.4}K_{0.6}(NO_3)_{1.4}$ 748

A. Griffin Rigorous density functional theory for inhomogeneous Bose-condensed fluids 755

J.R.D. Copley, D.A. Neumann, and W.A. Kamitakahara Energy distributions of neutrons scattered from solid C_{60} by the beryllium detector method 763

M.P. Zinkin, R.A. Cowley, R.S. Eccleston, A.C. Evans, and M.J. Harris Impulse approximation neutron scattering from N_2 772

R.B. Rogge, B.D. Gaulin, E.C. Svensson, E.D. Hallman, and W. Wei Neutron scattering near the order–disorder transition in Cu_3Au: Evidence for a lower spinodal temperature 779

E. Roger Cowley Finite lifetimes for intermediate phonon lines in anharmonic perturbation theory 792

B. Dorner, B. Schmid, K. Kakurai, and D. Petitgrand The phase diagram of $RbFeCl_3$ in a magnetic field perpendicular to the chain direction 800

D. Walton Relaxation and aging in lattice glasses 805
